

Name: Cristian Calvo
Nationality: Argentine/Italian
Email: cristiancalvo80@gmail.com
Cell phone: +549 249 4489780

Professional Summary

Full Stack Web Developer with a strong foundation in object-oriented programming (OOP), software design patterns, and backend development using TypeScript. Practical experience building and deploying web applications using GitHub Pages, Netlify, and AWS S3. Familiar with agile methodologies (Scrum) and SOLID principles. Adept at working independently and under pressure, with a proactive and problem-solving mindset. Currently expanding skills in complex problem solving, cloud computing, and DevOps practices.

Technical Skills

- Languages & Frameworks: JavaScript, TypeScript, Node.js, HTML, CSS
- Backend & APIs: RESTful API Development, Nestjs
- Cloud & Deployment: AWS S3, GitHub Pages, Netlify, Docker
- DevOps & Tools: Linux, Git, GitHub, Docker, CLI scripting
- Practices: OOP, SOLID principles, Scrum, Agile
- Others: Blockchain knowledge, problem-solving

Highlighted Projects

- Cocktail API: Developed a RESTful API for accessing cocktail data, implemented with TypeScript and deployed to the cloud.
- Cheque Management App: Built a full-featured CRUD application for managing incoming and outgoing checks, using TypeScript, NestJS, and a PostgreSQL database.
- GitHub Portfolio: Includes frontend and backend mini-projects showcasing skills in deployment, API integration, and responsive UI design. View more at: github.com/crigca

Education

High School Diploma – Domingo Faustino Sarmiento National High School
March 1991 – December 1998 | Natural Sciences orientation

Certifications

- Full Stack Web Development – Ongoing (March 2024 – Present)
- Complex Problem Solving – Universidad Internacional de La Rioja (UNIR), April 2025 – Present
- Scrum Fundamentals – September 2024
- AWS Cloud Practitioner – July 2023
- AWS Solutions Architect (Attempted) – November 2023
- Networking Basics (25 hrs) – Cisco Networking Academy, March 2023
- Introduction to Cybersecurity (6 hrs) – Cisco Networking Academy, January 2023
- Investment Analyst (40 hrs) – National Technological University, 2017

Courses & Technical Training

- AWS Cloud Practitioner (10 hrs) – Udemy, Antonio Corbalan, May 2023
- Docker & Kubernetes (6 hrs) – Udemy, Antonio Corbalan, March 2023
- Linux Sysadmin LPIC-1 101 & 102 (35 hrs total) – Udemy, Antonio Corbalan, 2022
- Linux CLI & Shell Scripting (15 hrs) – Udemy, Antonio Corbalan, March 2022
- Basic Programming Course (55 hrs) – Maxi Programa, UTN, 2022

Additional Experience

- Freelance Agricultural Work: Led machinery repair operations, coordinated work crews, managed invoicing and tax reporting.
- Team Leadership & Event Organization: Led a competitive paintball team and coordinated music events attended by over 5000 people.
- Personal Interests:
 - Self-taught in DevOps tools and cloud environments
 - Deep interest in blockchain and financial markets
 - Committed to continuous learning and skill expansion
